Subject: GTM follow up

Sir,

I wanted to reach out following the Department Head panel discussion at the GTM yesterday. The SUBFOR team is interested in a synch session to discuss the good work and collaboration across developers, operators and program officers in support of our Theatre ASW Offset work.

At your convenience, request your best availability for the ED and a small traveling party to come up to ONR and discuss.

Looking forward, and responding to RADM Hahn direction to the Science Advisors to more proactively engage your program officers, there are a number of capability initiatives worth discussing and pursuing. I'll reach out to the cognizant PO and will keep the various stakeholders informed of any proposals to the new FNC process or other appropriate funding avenue.

Standing by to discuss and support as desired.

v/r
